

**NOTICE OF COMPLETION
ENVIRONMENTAL SCREENING PROCESS
OSCEOLA WASTE DISPOSAL SITE
EXPANSION PROJECT**

The Township of Admaston/Bromley has completed an Environmental Screening Process (ESP) in accordance with Ontario Regulation 101/07 made under the Environmental Assessment Act (EAA). An Environmental Screening Report has been prepared and is available for public review at the Municipal Office and on the Municipal Website from November 6, 2013 to January 10, 2014.

The proposal is to expand the existing 1.52 ha landfilling area to 2.66 ha which increases the waste disposal capacity from 79,000m³ to 178,740m³. The fill area is located in a total site area of 25.3 ha owned by the municipality and an additional 11.9 ha property will be added as a contaminant attenuation zone south of the fill area. The expansion will provide a 25 to 30 year waste management solution for the Township of Admaston/Bromley residents and business community.

If interested persons have outstanding concerns with the project, please advise the municipality. If a resolution cannot be achieved a person may make a written request to the Director to elevate the project to an individual environmental assessment. An elevation request must include:

- Name of the Project and Municipality
- Basis of the request
- Nature of the unresolved environmental concern
- The benefits of elevating the project to an individual EA
